

# “Quantitative live imaging of embryonic development”

Recruiting 3 positions:

**1 Postdoctoral researcher**

**1 PhD student**

**1 Research technician**

In our lab, we use quantitative imaging to study single-cell dynamics in live zebrafish and human embryos. We are particularly interested in the interface between development and immunity during early embryogenesis.

We are seeking highly motivated candidates with a strong passion for science to join our team at the Molecular Biology Institute of Barcelona.

We foster a friendly, inclusive, and productive environment.
